Unified Education Plan
## A Web Based System To Increase Access to Quality Education

Amir Muhammad, Nicholas Hong, Ryandeep Shelopal, Simran Kaur

OHLONE COLLEGE

Global Guidance
Education Designed to Unify

Abstract Every student deserves the right to an equal opportunity quality education. This web based system to provide a platform to both teachers and students globally and create interactive ways to connect through classes and videos. Education is a pathway to connecting students with the opportunities to succeed. Students are encouraged to connect with teachers to further understand subjects leading to further success.
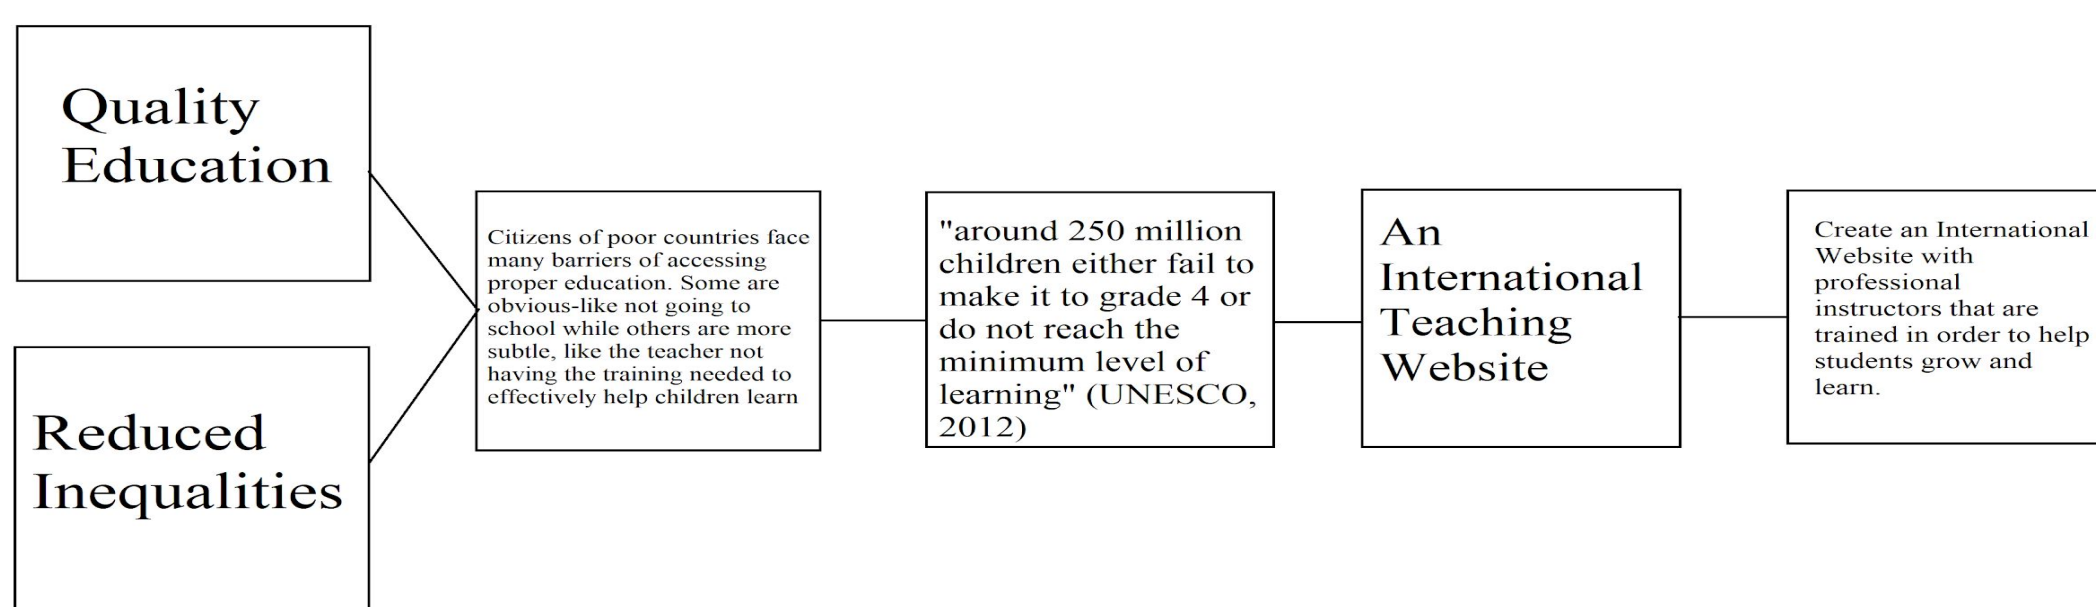

The Problem

- "around 250 million children either fail to make it to grade 4 or do not reach the minimum level of learning"
- lack of quality education
- many teachers do not have training needed to help students learn
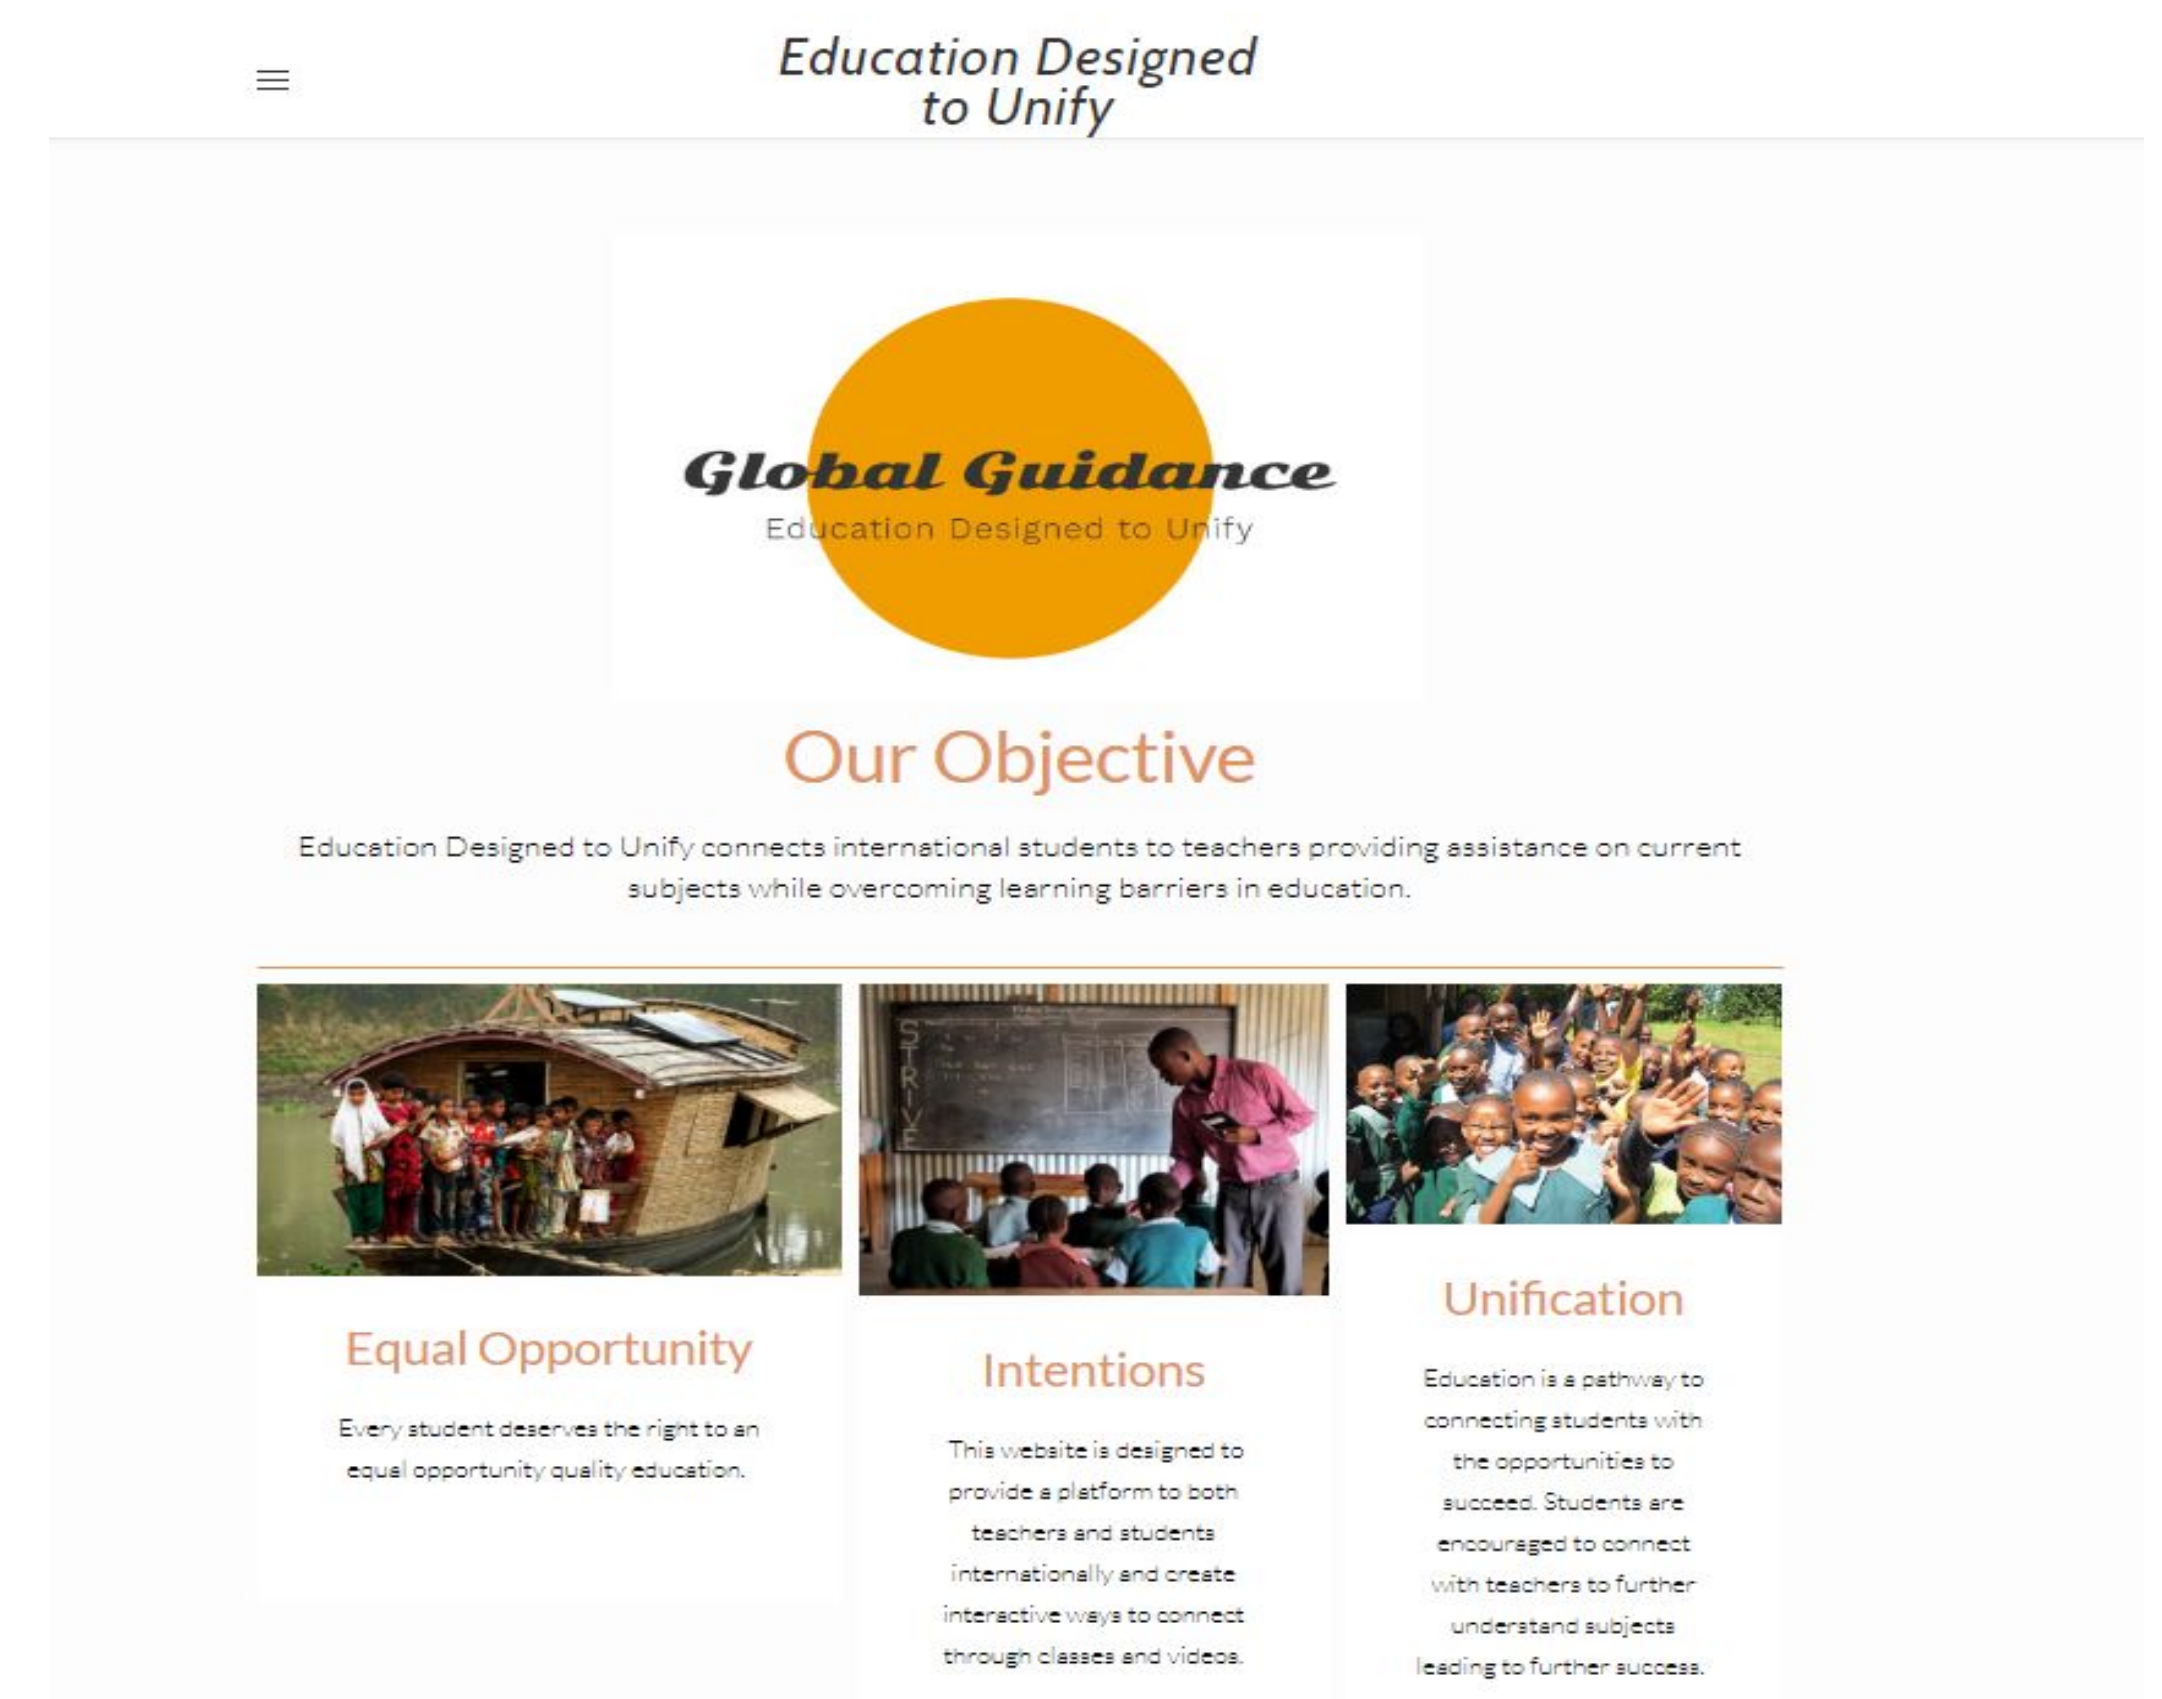

Background

Udemy   KHAN ACADEMY   k12

Previous solutions have information for students but lack the ability to connect students to teachers directly

Solution

Quality Education

Reduced Inequalities

Citizens of poor countries face many barriers of accessing proper education. Some are obvious-like not going to school while others are more subtle, like the teacher not having the training needed to effectively help children learn

"around 250 million children either fail to make it to grade 4 or do not reach the minimum level of learning" (UNESCO, 2012)

An International Teaching Website

Create an International Website with professional instructors that are trained in order to help students grow and learn.

Design

Education Designed to Unify

Global Guidance
Education Designed to Unify

Our Objective
Education Designed to Unify connects international students to teachers providing assistance on current subjects while overcoming learning barriers in education.

Equal Opportunity
Every student deserves the right to an equal opportunity quality education.

Intentions
This website is designed to provide a platform to both teachers and students internationally and create interactive ways to connect through classes and videos.

Unification
Education is a pathway to connecting students with the opportunities to succeed. Students are encouraged to connect with teachers to further understand subjects leading to further success.

- Constructed through Weebly's Domain Hosting Service
- Cost's roughly $30 a year to run the site
- Incorporated HTML, CSS, and Javascript to further develop the Matching-Algorithm

Benefits to the World:

- Growing Economies
- Societal Longevity
- Reduces Poverty
- Increased Income
- Interactive Experiences
- KNOWLEDGE!

Results

Usability	Yes/No
User 1	Yes
User 2	No
User 3	Yes
User 4	Yes
User 5	Yes

Conclusion

Our web system is constantly adapting and striving to improve the overall quality of the user interface and student to teacher interaction. We could improve on the matching algorithm, as well as implementing more courses into our curriculum.
